\$2.50 per acre. By judicious management the land may be plowed and fenced the first, and under a high state of cultivation the second year.

Corn, Grain, Cattle, &c., will be forwarded at reasonable rates to Chiespo for the Eastern market and to Cairo for the Southern. The larger yield on the chesp lands of illinois over the high-priced lard in the Eastern and Middle States is known to be much more than sufficient to pay the difference of transportation to the Eastern market.

Bituminous Coal is mined at several points along the Road, and is a chesp and desirable fuel. It can be delivered at several points along the Road, and is a chesp and desirable fuel. It can be delivered at several points along the Road at \$1.50 to \$4 per tun. Wood can be had at the same rates per cord.

Those who think of settling in lows or Minnesots, should bear in mind that lends there of any value, along the water-courses and for many miles unland, have been disposed of; that for those located in the interior there are no convenience for transporting the produce to market, mitrods not having been introduced there; that to send the produce of these lands one or two hundred miles by wagon to market would cost much more than the expense of cultivating them, and hence Government lands thus situated, at \$1.25 per acre, are not so good investments as the land of this Compeny at the prices fixed.

The same remarks hold good in relation to the lands in Kansas and Nebrask, for although wavent lands may be found nearer the water courses, the distance to market is far greater, and every hundred miles the produce of these lands is carried either in wagons, or interrupted waier communications, increases the expenses of transportation, which must be home by the settlers in the reduced prices of their product; and to that extent precisely are the incomes from their farms, and of course on their investments, annually and every year reduced.

The great fertility of the lands now offered for sale by this Compeny, and their consequent yield over those o MRS. of contract, and the others annually thereafter. The last payment will become due at the end of the sixth year from the date of the contract.

INTEREST WILL BE CHARGED AT ONLY THREE PER CENT PER ANNUM.

As a security to the performance of the contract, the first two years' interest must be paid in advance, and it must be understood that at least one-tenth of the land purchased shall yearly be brought under cultivation. Longer credits, at 6 per cent per annum, may be negotisted by special application. Twenty per cent from the credit price will be deducted for cash. The Company's construction bonds will be received as eash.

Ready-framed Farm Euildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 feet by 20 feet, divided into one living and three beforeoms, and will cust complete, set up on ground chose a narywhere along the road, \$150 in cash, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials for such buildings over their road promptly.

Special arrangements with dealers can be made to supply those purchasing the Company's lands with fencing materials, sgricultural tools, and outfit of provisions in any quantity at the lowest wholesale prices.

It is believed that the price, long credit, and low rate of interest charged for these lands, will enable a man with a few hundred dellars in cash and ordinary industry to make himself independent before all the purchase money becomes due. In the mean time, the rapid settlement of the country will probably have increased their value four or five fold. When required, an experienced person will accompany applicants to give information and aid in selecting lands.
